This summer BE BOLD. Change the way you LEARN, the way you think, and the way you LEAD. Spend three weeks at Wake Forest University discovering how to CHANGE THE WORLD. EXPERIENCE a NEW WAY of problem solving. Join a cohort of students who will CHALLENGE each other intellectually as experts teach you to TACKLE TOUGH ISSUES, examine them through different LENSES, and then NAVIGATE through their complexities. Become equipped to SOLVE problems creatively, and make a positive impact through SERVICE.
NOT YOUR TYPICAL SUMMER PROGRAM: LENS@Wake Forest is a summer program like no other. Think of it as an incubator for change-makers. Here, you’ll learn from experts who can teach you how to confront complex issues and tap into your potential to develop solutions. We’re not talking solutions on paper – we’re talking viable ones that will be put into action.

A diverse cohort of students from across the U.S. will follow a program of study based on the global challenges of sustainability. You’ll partner with Wake Forest professors and affiliates to examine the complexities of this issue through different lenses – biological, ecological, economic, political, social, legal and more. Questions will arise. Problems will surface.

You will team with peers to tackle a real-world challenge. Small group sessions will provide a platform for you to explore ideas through research, work with Wake Forest professors, write proposals and fine-tune results into a community action plan. In three weeks, you will have challenged your critical thinking skills and learned to step outside the box when it comes to translating ideas into action. You can count on challenging work, lively discussions and powerful creative energy.

You do know there’s fun involved – after all, it is a college experience with new friends, social activities, dinner downtown, movies, playing ultimate on the Quad. A little taste of independence…

SO GO AHEAD…APPLY. BE DIFFERENT THIS SUMMER – AND MAKE A DIFFERENCE!

Apply today @ lens.wfu.edu
Rising high school juniors & seniors are eligible. Applications accepted on a rolling basis. Scholarships available. See website for details.
